**DOCUMENTATION** for FyleProject:

Github link: https://github.com/garimamangalhara/FyleProject

Heroku deployed app link: https://guarded-oasis-68385.herokuapp.com/

This web application consists of 2 pages:

1. The Main Page(List of all the banks):
    - If you click on the 'Show favorites' button, only the favorite marked banks will be displayed
    - If you select any city from the top dropdown, it will apply a city filter on the table data
    - You can select the number of records on one page by entering the desired number in the input box and clicking enter
    - If you click on any record, it will redirect to the details page.
    - You can click on the checkbox on the left side to select/deselect a bank as favorite
    - You can filter globally on the table by using the global filter box.
    - The API request is cached using Http interceptor.

2. The details Page:
   - You can see the details of the bank branch you clicked on.

The details of the bank are:

IFSC Code: ABHY0065001
